JOÃO PEDRO SOARES DE FIGUEIREDO

FULL STACK SOFTWARE ENGINEER

Granada, Spain | jpbusinesss@hotmail.com | linkedin.com/in/joaopedrosoaresfigueiredo | github.com/Jpsoaresfig
Portfolio and 5-minute film: **jpsoaresfig.dev**
Nationality: Brazilian | **Work permit:** Spain | **Languages:** Portuguese (Native), English (C1 written / B2 spoken), Spanish (B2 comprehension / B1 spoken & written)

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 4+ years of experience building web, mobile and backend systems with Java (Spring Boot), TypeScript (React, Node.js), Python and SQL. Experience in REST architectures, applied AI integration, process automation, database optimization and cloud infrastructure across the financial, public and edtech sectors.

EDUCATION

- **Master's in Business Process Management & Technologies** — University of Granada (2026 – 2027)
- **B.Sc. in Computer Science** — Centro Universitário UNIPÊ (2025)

TECHNICAL SKILLS

- **Backend & Languages:** Java (Spring Boot), Node.js, Python, PHP, C#, SQL (PostgreSQL, MySQL, Oracle), REST APIs.
- **Frontend & Mobile:** React, Next.js, TypeScript, React Native, Capacitor, HTML5/CSS3.
- **Cloud, DevOps & AI:** Docker, AWS, GCP, Vercel, Supabase, Firebase, Nginx, OpenAI, Gemini, n8n, CI/CD.
- **Methodologies & Tools:** Git, Scrum, Jira, Confluence.
- **Enterprise & Low-Code:** Oracle APEX, BIRT, JasperReports, UiPath.

PROFESSIONAL EXPERIENCE

Full Stack Developer (Contract) | Ouse Passar Jan 2026 – Jul 2026

- End-to-end development (iOS/Android/Web) of "Código da Vida" as lead developer, using React, TypeScript, Capacitor and Supabase/PostgreSQL.
- AI agents and automated workflows (OpenAI, Gemini, n8n) for context-driven multimedia processing.
- Payment gateways and recurring subscriptions with Hotmart and RevenueCat.
- Infrastructure configuration (Nginx, VPS, load balancing) and SQL performance tuning on legacy databases.

Full Stack Developer (Contract) | Inovatec-JP Oct 2025 – Aug 2026

- **SiCAPS (PROCON-PB):** co-developed a field price-collection system with real-time geolocation tracking.
- **E-PROCON (PROCON-PB):** as part of the team, digitized paper-based inspection workflows, cutting processing time by ~70%, with LGPD-compliant dashboards.
- Integrated enterprise reporting engines and public interoperability services using Java (Spring Boot), BIRT and Jasper.

Software Developer Intern | Sicredi Evolução May 2024 – Sep 2025

- Built automation bots (UiPath/Python) for inactive account management, freeing up ~10% of operational capacity.
- Optimized a legacy PHP PDF generation engine, reducing processing time by ~5%.
- Developed a web-based IT inventory system for hardware tracking and asset traceability.

IT Support Technician | Sicredi Evolução Oct 2023 – May 2024

- Maintained network infrastructure, Windows/Linux servers, routers (EdgeRouter), switches and DigiEye CCTV systems.

Software Developer | Dev Dynamos Mar 2023 – Oct 2023

- Designed SQL entity-relationship models for DevConnect, created Figma wireframes and documented technical specs in Jira/Confluence.

SELECTED PROJECTS

- **Shark Smokehouse** — designed and built an e-commerce and management platform, in production with 61 registered users. Next.js, React, TypeScript, Firebase and Mercado Pago: server-side transactional checkout, PIX payments confirmed via webhook and checked against the Mercado Pago API, loyalty program, point of sale, marketing automations and 30 Vitest test files.
- **Final degree project: Spring Boot vs Quarkus** (team, highest grade) — equivalent CRUD APIs on Kubernetes (GKE), load-tested with JMeter. Spring Boot delivered lower latency and higher throughput; Quarkus used ~21 MiB vs ~271 MiB at idle and scaled with 3 pods vs 10.
