JOÃO PEDRO SOARES DE FIGUEIREDO

FULL STACK SOFTWARE ENGINEER

Granada, Spain | +55 (83) 99382-6429 | jpbusinesss@hotmail.com | linkedin.com/in/joaopedrosoaresfigueiredo | github.com/Jpsoaresfig

Nationality: Brazilian | **Languages:** Portuguese (Native), English (C1 written / B2 spoken), Spanish (B2 comprehension / B1 spoken & written)

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 3+ years of experience engineering web, mobile, and backend systems using Java (Spring Boot), TypeScript (React, Node.js), Python, and SQL. Expertise in REST architectures, AI integration, process automation, database optimization, and Cloud infrastructure across financial, public, and edtech sectors.

EDUCATION

- **M.Sc. in Business Process Management & Technologies** — University of Granada (2026 – 2027)
- **B.Sc. in Computer Science** — Centro Universitário UNIPÊ (2025)

TECHNICAL SKILLS

- **Backend & Languages:** Java (Spring Boot), Node.js, Python, PHP, C#, SQL (PostgreSQL, MySQL, Oracle), REST APIs.
- **Frontend & Mobile:** React, Next.js, TypeScript, React Native, Capacitor, HTML5/CSS3.
- **Cloud, DevOps & AI:** Docker, AWS, GCP, Vercel, Supabase, Firebase, Nginx, OpenAI, Gemini, n8n, CI/CD.
- **Methodologies & Tools:** Git, Scrum, Jira, Confluence.
- **Enterprise & Low-Code:** Oracle APEX.

PROFESSIONAL EXPERIENCE

Full Stack Developer | Ouse Passar Jan 2026 – Jul 2026

- End-to-end development (iOS/Android/Web) of "Código da Vida" using React, TypeScript, Capacitor, and Supabase/PostgreSQL.
- Implementation of AI-powered agents and automated workflows (OpenAI, Gemini, n8n) for context-driven multimedia processing.
- Integration of payment gateways and recurring subscription pipelines with Hotmart and RevenueCat.
- Infrastructure configuration (Nginx, VPS, load balancing) and SQL query performance tuning on legacy databases.

Full Stack Developer | Inovatec-JP Oct 2025 – Aug 2026

- **SiCAPS (PROCON-PB):** Co-developed a field price-collection system with real-time geolocation tracking.
- **E-PROCON (PROCON-PB):** Digitized paper-based inspection workflows, reducing processing time by 70% with GDPR/LGPD-compliant dashboards.
- Integrated enterprise reporting engines and public interoperability services using Java (Spring Boot), BIRT, and Jasper.

Software Developer Intern | Sicredi Evolução May 2024 – Sep 2025

- Built automation bots (UiPath/Python) for inactive account management, freeing up ~10% active system capacity.
- Optimized legacy PHP PDF generation engines, reducing processing overhead by 5%.
- Developed a web-based IT inventory management system for hardware equipment tracking and asset traceability.

IT Support Technician | Sicredi Evolução Oct 2023 – May 2024

- Maintained network infrastructure, Windows/Linux servers, routers (EdgeRouter), switches, and DigiEye CCTV systems.

Software Developer | Dev Dynamos Mar 2023 – Oct 2023

- Designed SQL Entity-Relationship (ER) database models for DevConnect, created Figma wireframes, and documented technical specs in Jira/Confluence.
